Who is my neighbour?

PUPIL ALLERGY POLICY & PROCEDURE

Signed	Date	Review Date
Charlotte Whittle, Headteacher	January 2026	January 2029
Eileen Barnes-Vachell and Iliffe Kenyon, Chair of Governors	January 2026	January 2029

1. Aims

This policy aims to:

- o Set out our school's approach to allergy management, including reducing the risk of exposure and the procedures in place in case of allergic reaction
- o Make clear how our school supports pupils with allergies to ensure their wellbeing and inclusion
- o Promote and maintain allergy awareness among the school community

2. Legislation and guidance

This policy is based on the Department for Education (DfE)'s guidance on [allergies in schools](#) and [supporting pupils with medical conditions at school](#), the Department of Health and Social Care's guidance on [using emergency adrenaline auto-injectors in schools](#), and the following legislation:

- o [The Food Information Regulations 2014](#)
- o [The Food Information \(Amendment\) \(England\) Regulations 2019](#)

3. Roles and responsibilities

We take a whole-school approach to allergy awareness.

Roles:

Headteacher	Policy
School Business Manager	Spare AAls Training Individual Health Care Plans
All staff	Understand allergy management in school

3.1 Allergy lead

The nominated allergy lead is the School Business Manager.

They're responsible for:

- o Promoting and maintaining allergy awareness across our school community
- o Recording and collating allergy and special dietary information for all relevant pupils (all allergy and dietary information is included in the Orange Class folder)

Ensuring that:

- o All allergy information is up to date and readily available to relevant members of staff
- o All pupils with allergies have an allergy action plan completed by a medical professional
- o All staff receive an appropriate level of allergy training
- o All staff are aware of the school's policy and procedures regarding allergies
- o Relevant staff are aware of what activities need an allergy risk assessment
- o Keeping stock of the school's adrenaline auto-injectors (AAls)

- o Regularly reviewing and updating the allergy policy

3.2 School office

The school office is responsible for:

- o Co-ordinating the paperwork and information from families
- o Co-ordinating medication with families
- o Checking spare AAls are in date
- o Any other appropriate tasks delegated by the allergy lead

3.3 Teaching and support staff

All teaching and support staff are responsible for:

- o Promoting and maintaining allergy awareness among pupils
- o Maintaining awareness of our allergy policy and procedures
- o Being able to recognise the signs of severe allergic reactions and anaphylaxis
- o Attending appropriate allergy training as required
- o Being aware of specific pupils with allergies in their care
- o Carefully considering the use of food or other potential allergens in lesson and activity planning
- o Ensuring the wellbeing and inclusion of pupils with allergies

3.4 Parents/carers

Parents/carers are responsible for:

- o Being aware of our school's allergy policy
- o Providing the school with up-to-date details of their child's medical needs, dietary requirements, and any history of allergies, reactions and anaphylaxis
- o If required, providing their child with 2 in-date adrenaline auto-injectors and any other medication, including inhalers, antihistamine etc., and making sure these are replaced in a timely manner
- o Carefully considering the food they provide to their child as packed lunches and snacks, and trying to limit the number of allergens included
- o Following the school's guidance on food brought in to be shared
- o Updating the school on any changes to their child's condition

3.5 Pupils with allergies

These pupils are responsible for:

- o Being aware of their allergens and the risks they pose
- o Understanding how and when to use their adrenaline auto-injector
- o If age-appropriate, understanding how to use their adrenaline auto-injector in the event of an anaphylactic shock and only using it for its intended purpose

3.6 Pupils without allergies

These pupils are responsible for:

- o Being aware of allergens and the risk they pose to their peers
- o Telling an adult if they believe another pupil needs urgent help
- o Older pupils might also be expected to support their peers and staff in the case of an emergency.

4. Assessing risk

The school will conduct a risk assessment for any pupil at risk of anaphylaxis taking part in:

- o Lessons such as food technology
- o Science experiments involving foods
- o Crafts using food packaging
- o Off-site events and school trips
- o Any other activities involving animals or food, such as animal handling experiences or baking

A risk assessment for any pupil at risk of an allergic reaction will also be carried out where a visitor requires a guide dog.

5. Managing risk

5.1 Hygiene procedures

To prevent contamination in school;

- o Pupils are reminded to wash their hands before and after eating
- o Sharing of food is not allowed
- o Pupils have their own named water bottles

5.2 Catering

The school is committed to providing safe food options to meet the dietary needs of pupils with allergies.

- o Catering staff receive appropriate training and are able to identify pupils with allergies
- o School menus are available for parents/carers to view with ingredients clearly labelled
- o Where changes are made to school menus, we will make sure these continue to meet any special dietary needs of pupils
- o Food allergen information relating to the 'top 14' allergens is displayed on the packaging of all food products, allowing pupils and staff to make safer choices. Allergen information labelling will follow all [legal requirements](#) that apply to naming the food and listing ingredients, as outlined by the Food Standards Agency (FSA)
- o Catering staff follow hygiene and allergy procedures when preparing food to avoid cross-contamination

5.3 Food restrictions

We acknowledge that it is impractical to enforce an allergen-free school. However, we would like to encourage pupils and staff to avoid certain high-risk foods to reduce the chances of someone experiencing a reaction. These foods include:

- o Packaged nuts
- Pupils Allergy policy

- o Cereal, granola or chocolate bars containing nuts
- o Peanut butter or chocolate spreads containing nuts
- o Peanut-based sauces, such as satay
- o Egg based baked/cooked food items

If a pupil brings these foods into school, they may be asked to eat them away from others to minimise the risk, or the food may be confiscated.

5.4 Insect bites/stings

To reduce the risk of insect bites/stings when outdoors:

- o Shoes should always be worn
- o Food and drink should be covered

5.5 Animals

- o All pupils will always wash hands after interacting with animals to avoid putting pupils with allergies at risk through later contact
- o Pupils with animal allergies will not interact with animals

5.6 Support for mental health

Pupils with allergies will be supported with minimal awareness of other pupils to avoid extra attention. Allergies will be treated as normal and with respect. Any children experiencing bullying will be encouraged to speak to a trusted member of staff; for example their teacher or ELSA.

Pupils with allergies will have additional support through:

- o Pastoral care
- o Regular check-ins with their class teacher

5.7 Events and school trips

- o For events, including ones that take place outside of the school, and school trips, no pupils with allergies will be excluded from taking part
- o The school will plan accordingly for all events and school trips, and arrange for the staff members involved to be aware of pupils' allergies and to have received adequate training
- o Appropriate measures will be taken in line with the schools AAI protocols for off-site events and school trips (see section 7.5).

6. Procedures for handling an allergic reaction

6.1 Register of pupils with AAI

The school maintains a register of pupils who have been prescribed AAI or where a doctor has provided a written plan recommending AAI to be used in the event of anaphylaxis. The register includes:

- o Known allergens and risk factors for anaphylaxis
- o Whether a pupil has been prescribed AAI(s) (and if so, what type and dose)

- o Where a pupil has been prescribed an AAI, whether parental consent has been given for use of the spare AAI, which may be different to the personal AAI prescribed for the pupil
- o A photograph of each pupil to allow a visual check to be made (parental consent required)
- o The main register is kept in the main office and can be checked quickly by any member of staff as part of initiating an emergency response

6.2 Allergic reaction procedures

- o As part of the whole-school awareness approach to allergies, all staff are trained in the school's allergic reaction procedure, and to recognise the signs of anaphylaxis and respond appropriately
- o Staff are trained in the administration of AAI's to minimise delays in pupil's receiving adrenaline in an emergency
- o If a pupil has an allergic reaction, the staff member will initiate the school's emergency response plan, following the pupil's allergy action plan
- o If an AAI needs to be administered, a member of staff will use the pupil's own AAI, or if it is not available, a school one
- o If the pupil has no allergy action plan, staff will follow the school's procedures on responding to allergy and, if needed, the school's normal emergency procedures; assess condition, administer AAI while other staff member calls ambulance
- o A school AAI device will be used instead of the pupil's own AAI device if:
- o Medical authorisation and written parental consent have been provided, or
- o The pupil's own prescribed AAI(s) are not immediately available (for example, because they are broken, out-of-date, have misfired or been wrongly administered)
- o If a pupil needs to be taken to hospital, staff will stay with the pupil until the parent/carer arrives, or accompany the pupil to hospital by ambulance
- o If the allergic reaction is mild (e.g. skin rash, itching or sneezing), the pupil will be monitored and the parents/carers informed

7. Adrenaline auto-injectors (AAIs)

7.1 Purchasing of spare AAI's

The allergy lead is responsible for buying AAI's and ensuring they are stored according to the guidance.

Procedures for buying spare AAI's;

- o Where the AAI's will be sourced (i.e. a local pharmacy or reputable source)
- o The quantity of AAI's required
- o Which brand(s) of AAI are purchased (schools are recommended to buy a single brand to avoid confusion)
- o The dosage required (based on Resuscitation Council UK's age-based criteria, see page 11 of [the guidance](#))

7.2 Storage (of both spare and prescribed AAI's)

The allergy lead will make sure all AAI's are:

- o Stored at room temperature (in line with manufacturer's guidelines), protected from direct sunlight and extremes of temperature

- o Kept in a safe and suitably central location to which all staff and clubs have access at all times, but is out of the reach of children
- o **Not** locked away, but accessible and available for use at all times
- o **Not** located more than 5 minutes away from where they may be needed

Spare AAI's will be kept separate from any pupil's own prescribed AAI, and clearly labelled to avoid confusion.

7.3 Maintenance (of spare AAI's)

The School Business Manager and the main office are responsible for checking monthly that:

- o The AAI's are present and in date
- o Replacement AAI's are obtained when the expiry date is near

7.4 Disposal

AAI's can only be used once. Once a AAI has been used, it will be disposed of in line with the manufacturer's instructions (e.g. in a sharps bin).

7.5 Use of AAI's off school premises

- o Pupils at risk of anaphylaxis who are able to administer their own AAI's should carry their own AAI with them on school trips and off-site events
- o Depending on the nature and duration of the trip, the risk assessment may include taking a spare AAI

7.6 Emergency anaphylaxis kit

The school holds an emergency anaphylaxis kit. This includes:

- o Spare AAI's
- o Instructions for the use of AAI's
- o Instructions on storage
- o Manufacturer's information
- o A checklist of injectors, identified by batch number and expiry date with monthly checks recorded
- o A note of arrangements for replacing injectors
- o A list of pupils to whom the AAI can be administered
- o A record of when AAI's have been administered

8. Training

The school is committed to training all staff in allergy response. This includes:

- o How to reduce and prevent the risk of allergic reactions
- o How to spot the signs of allergic reactions (including anaphylaxis)
- o The importance of acting quickly in the case of anaphylaxis
- o Where AAI's are kept on the school site, and how to access them
- o How to administer AAI's

- o The wellbeing and inclusion implications of allergies

Training will be carried out annually by the allergy lead or external provider.

9. Links to other policies

This policy links to the following policies and procedures:

- o Health and safety policy
- o Supporting pupils with medical conditions policy
- o School food policy

'We aspire to encourage diversity and a love of learning that nurtures well-rounded individuals, with curious minds, who shine in service to our community and are inspired to flourish. We do this by always asking ourselves 'Who is my neighbour?'
